DESCRIPTION

Textile stirrup composed of four steps, designed to help during progression and rope and to facilitate technical passages in work at height. It can also be used for aid climbing and during caving ascents. Upper and lower attachment points reinforced with protective sheath. The lower attachment point allows to connect several brackets in series. Reinforcement on every single step that keeps the buttonhole open and facilitates the insertion of the foot. Additional top buttonhole used as a handle to lift up. The double step at the base allows you to couple your feet and take a rest position by relieving the compressions due to the use of the harness
