

CLUTCH

single wearable tool suited for efficient hauling, controlled lowering, smooth personal descent, easy ascending, and reliable progress capture

Certification

• EN 12841 : 2006/C

• EN 341 : 2001 / 2A

• EN 15151-1 : 2012 / 8

• ANSI Z359.4-2013

• NFPA 1983

Industry Type

- Tactical
- Oil and Gas/Mining
- Chemical and Pharma
- Fire and Disaster Mgmt
- Government Departments
- Railways
- Metals and Cement
- Manufacturing
- Construction
- Adventure Parks and Hospitality

- Aerospace
- Telecommunication
- Arboriculture

DESCRIPTION

Suited to a multitude of rigging operations, the CLUTCH delivers efficient operation, ease of use, and optimal control. It moves seamlessly between anchor-based systems and personal use, offering unmatched versatility for the rope technician. With the CLUTCH, more is possible. Features: Single wearable tool for efficient hauling, controlled lowering, smooth personal descent, easy ascending, belaying, and Twin Tension Rope Systems. Delivers up to 38% higher efficiency in hauling and ascending than a cam-style device: reducing changeovers. Moves seamlessly between anchor-based systems and personal use: reducing gear cache volume and weight. Combines the key features of personal descenders and load management devices: reducing equipment training and cost. Instantly transitions between hauling and lowering or ascent and descent without having to transfer the load. Allows main and belay lines to be mirrored, twin-tensioned, or nested in Double CLUTCH technique (handles controlled by single operator). Replaces 8 pieces of traditional equipment: pulley, rescue rack, anchor plate, load release strap, prusik cord, and 3 carabiners. The 11 mm CLUTCH and CMC's G11 Lifeline can be used together to build NFPA G-Rated systems using 11mm rope, saving space and reducing weight. The 11 mm CLUTCH is compatible with 10.5 11 mm rope and certified to NFPA 1983 General Use, ANSI, and EN standards. Its the only device for 10.5 11 mm rope that carries all these certifications.
