

HANGER

Hanger -Auto Lock Rigging device.

Certification

- EN 12278

Industry Type

- Tactical
- Oil and Gas/Mining
- Chemical and Pharma
- Fire and Disaster Mgmt

DESCRIPTION

The Hanger system has been designed for material handling (not recommended for use with people). The Hanger system has brake pawls on one side only which means that there is no restriction on hauling speed/movement. The one-way locking Hanger system is therefore ideal in a setting where a user needs to haul quickly, such as when unloading materials from a supply vessel at an offshore wind turbine. The Hanger system can be used in a 2:1 hauling system (SWL 250kg) and is available as kit:

Variants

PRODUCT CODE	WEIGHT	MATERIAL	COLOR	MBS (MINIMUM BRAKING STRENGTH)	NUMBER OF PERSONS	WORKING LOAD LIMIT	COMPATIBLE WITH ROPE DIAMETER
RP-433 LH-ALF	1.4 KG	ALUMINIUM	GRAY	25 KN	2	250 KG	11 MM
