- Fire and Disaster Mgmt

DESCRIPTION

Making the task easy, the Maxi Hoist features reliable pre-assembled components working together as a 5:1 hauling system. Designed for use with a tripod, bipod, scaffolding or suspension equipment, the Maxi Hoist / Extractor makes the job safer and easier with its incorporated rope safety self-locking device that prevents return of the loaded cargo to its previous position.. Primarily used for rescue operations and industrial safety applications this hoist is great for extraction in confined space rescue, scaffolding loading and unloading, facilitates maintenance and confined spaces activities using a tripod or a bipod. This mechanical advantage systems includes an ample amount of rope for most operations . Custom configurations are also available upon request.
