Mini Hoist

DESCRIPTION

Mini Hoist / Extractor is a popular hauler used in adventure parks but performs well in many applications due to its quality lightweight components and overall design. With this mechanical advantage lifting ratio of 1:7, it works perfectly during lifting operations and makes easier the work of the operator. It features a pre-assembled system with a small footprint that is easy to set up and use. The Mini hoist also features a remarkable self-locking safety mechanism that is used to returning the load to its previous position. The Kong mechanical advantage system uses quality components such as their 5 mm rope rigged with pulleys, carabiners, connectors and a locking device which makes this device perfect for hauling in almost any application.
