DESCRIPTION

Dynamic Rage Climbing Rope is perfect for any climber, whether scaling rock or ice! This single, smoother rope is designed for normal use in sport routes, indoor climbing, and low difficulty interval climbing. Each strand is braided separately into the sheath which increases resistance to abrasion, creating a compact and smooth surface that provides balance and better handling properties. The Dynamic Rage Climbing Rope meets safety requirements relevant to European regulations as well as those of the UIAA (International Mountaineering and Climbing Foundation).
